

The End is Coming for Windows 7 / Server 2008

Did you know?

Microsoft has announced that as of 14th January 2020, Windows 7 and Windows 2008/R2 will reach end of life. After this date, Microsoft will cease support and end users will use these operating systems at their own risk.

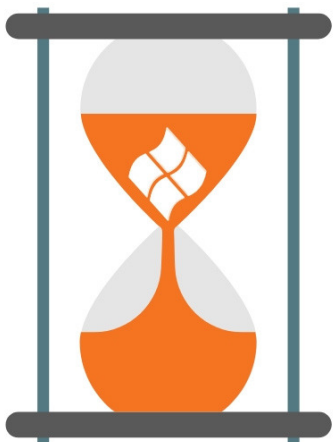

What does this mean?

There will no longer be any new patches, features or bug fixes released. With new malware developed daily – devices using out of date operating system will not receive regular security updates, leaving you business exposed to cyber-attack.

What is the solution?

Planning for your upgrade should start now to prevent unnecessary risks.

We are here to ensure you get the best solution and upgrade to devices that will deliver optimal results for your business – increasing efficiency and saving you money in the long term.

Don't put your business at risk.

Now is the perfect time to speak to us.

Contact Hayley Milne and find out how we can help you make the switch with complete ease.
